SAMPLE OBJECTIVES
THE GOOD, THE BAD & THE UGLY

Upon completion of the course, students should be able to:

Describe the impediments to effective communication and how to prevent them from occurring.

The students will: Exhibit a professional demeanor.

Upon completion of this course, the student will be able to:

Demonstrate familiarity with presentation, treatment and management of common medical problems encountered by family physicians.

As we focus on the pathology, differential diagnoses, therapeutics, and psychosocial impact involved in a specific case, you should be able to:

- Classify a patient's disease(s), determining potential causes of the disease(s).
- Research and draw upon the current trends in management of the disease(s).
- Discuss plans for intervention based on your research.
- Explain how the body, mind and spirit affect a patient’s disease process.
- Make ethical decisions regarding the management of the case.
- Counsel and manage a patient on appropriate therapy.

Goal: Be able to perform a chest and lung examination and evaluation.

Lecture Objectives:

- Identify the important questions to ask a patient with a pulmonary complaint.
- Be able to describe important aspects of the related history that are relevant for evaluation of the chest and lungs.
- Be able to describe what kinds of questions to ask the patient in the review of related history of the chest and lungs.
- Be able to describe how to examine the chest and lungs.
- Be able to recognize signs related to pulmonary problems.
- Be able to describe the basic anatomy and physiology of the chest and lungs.
