Macomb County Immunization Clinics**

Immunizations for Infants, Children, Adolescents and Adults

The Macomb County Health Department Immunization Clinic provides vaccines -- on a walk-in basis or by appointment -- to protect all persons in our communities from vaccine preventable disease.

You can save time by printing and completing the forms at home before visiting one of our health centers. **Both** forms must be completed by a parent or guardian.

Please bring with you to the health center: *immunization record(s) and valid Medicaid and/or Medicare card along with any supplemental insurance cards.*

For appointments or more information, please call one of our health centers: Mount Clemens (586) 469-5372; Warren (586) 465-8537; St. Clair Shores (586) 466-6800.

Cost of Vaccines

- Macomb County Health Department does not bill commercial insurance companies. If you have commercial insurance, check with your health care provider for possible immunization benefit coverage.
- Macomb County Health Department does participate in the [Vaccines for Children Program \(VFC\)](#). Participants of this program who are unable to afford the administration fee should talk with one of the clinic nurses.
- *Effective 1/3/2014 there is a vaccine administration charge of \$10 for each vaccine given.* In addition, vaccine fees will be charged to individuals who are not eligible for Federal and/or State vaccine programs. Payment is by *cash or check only*; we do not accept debit or credit cards.
- Medicaid/Medicare will be billed for approved vaccines - no out of pocket expenses.
- [Helping adults pay for vaccines.](#)

Vaccine Recommendations for Adults

Why might some adults need vaccines?

Some adults incorrectly assume that the vaccines they received as children will protect them for the rest of their lives. Generally this is true, except that:

- some adults were never vaccinated as children
- newer vaccines were not available when some adults were children
- immunity can begin to fade over time
- as we age we become more susceptible to serious disease caused by common infections (e.g. flu, pneumococcus)
- [Vaccine Recommendations for Adults](#)

Vaccine Recommendations for Teenagers

The vaccines recommended for pre-teens and teens prevent serious, sometimes life-threatening infections.
