## **PRE-APPROVAL AND PRE-REQUISITES**

- Approvals from the facility where the rotation will occur and COM Clerkship Education [COM.clerkship@msu.edu](mailto:COM.clerkship@msu.edu) is required for every selective/elective rotation.
- 30-day advance application approval required (applies to a rotation add, change or cancellation)

## **GENERAL DESCRIPTION**

Welcome to the Pain Management Service. We believe that you will find your experience to be a valuable one. Our physicians strive to treat patients with quality and compassionate care and we ask that you, in turn, treat all patients with the same care that you expect for you and for those close to you.

This rotation is a balance of *clinical encounters*, *didactic sessions* and *reading assignments*. This blend should provide you with a strong foundation in your approach to Chronic Pain Management. There will be one-on-one teaching on this rotation and you will find the Pain Management physicians to be easily approachable and readily available. You alone, however, will determine what your experience will be. The attitude and the interest you demonstrate in learning, the more you will benefit from your clinical experience.

The enclosed syllabus represents the minimum didactic requirements that are to be mastered during your rotation. All Pain Management educational conferences are mandatory. You must check with the department rotation office for time and scheduled dates that will be in effect during your rotation.

Rotations are typically two weeks, 3 credit hours or four weeks, 6 credit hours in duration. Timeframes for each rotation are decided at least 30 days prior to the beginning of the rotation. The overall performance of course participants will be evaluated through customary assessment instruments normally employed by the department for core rotations, at the discretion of the instructor of record.

Please note that we have included links to the reading materials. Should the links not work for you, please cut and paste them the link into a browser window and the material should load for you.

You can find additional resources at: <http://libguides.lib.msu.edu/medicalebooks>

## GOALS

1. Observe and participate in the evaluation, intra – operative, pre - operative and post - operative management of patients requiring surgery.
2. Demonstrate the ability to appropriately evaluate in post-operative care management of patients.
3. Demonstrate the ability to perform and record an osteopathic structural examination on a surgical patient and document such using acceptable osteopathic terminology
4. Interact with patients and their families in a respectful, sensitive, and ethical manner.
5. Interact with members of the team, patient care units and ambulatory clinic personnel in a respectful, responsible, and professional manner.
6. To review the Entrustable Professional Activities and Osteopathic Core Competencies located on D2L under the Additional Information module.

Clinical education in Chronic Pain Management involves achieving competence in two important areas: Acquisition of a specific body of information/knowledge and, Acquisition of the various mechanical (psychomotor) skills associated with the practice of pain management. The acquisition and demonstration of a core set of pain management skills is especially relevant to the adequate application of the art and science of chronic, as well as acute pain Management. These skills vary in complexity from the insertion of an intravenous line to the many increasingly complex diagnosis and therapeutic modalities experienced within this discipline. Mastery of these skills will often require repetition in order for students to achieve the requisite skill level and degree of competence required.

## OBJECTIVES

At the completion of this Chronic Pain Management rotation, in each of the following categories, you, as a student, should be able to:

- **Pre-treatment evaluation**

Obtain a history and physical examination, including musculoskeletal status, and, at a minimum, note all laboratory, radiographic and pertinent studies that may affect planned pain management protocols and modalities.

- **Basics of Chronic Pain Management Safety and Monitoring.**

Complete a pre-procedure examination of all therapeutic equipment and medications (and including, as appropriate, the anesthesia machine and related monitoring devices).

- **Analgesic Medications**

Define and describe the pharmacodynamics, pharmacokinetic, physiological, and postoperative effects of all agents used in pain medicine clinical practice as well as appropriate drug interactions. Understand and describe the State and National guidelines for prescribing controlled substances for pain.

- **Airway Management**

Be able to maintain an oral, oropharyngeal and/or or tracheal airway.

- **Spinal, Epidural, and Regional Analgesia/Anesthesia**

Describe appropriate patterns of regional anesthesia usage, including indications, contraindications, principles of use, physiological effects, medications, basic techniques, proper dosage, as well as recognition of the manifestations of toxicity.

- **Psychological**

Understand and describe the principles of multimodal and interdisciplinary pain management, including psychological, physiotherapy, and rehabilitation evaluations and treatment options.

## **Special Considerations**

1. Medicare cases. Per HCFA regulations, medical students may not chart on a patient with Medicare insurance if the department wishes to obtain reimbursement for this care. Medical students may participate in the care of these patients but may not be the primary caregiver. There may be other special types of insurance that have the same rules in the area where you are performing your anesthesia rotation and you must follow the department rules regarding who you may and may not see.
2. Special Cases: Upon occasion you may be asked not to be involved in certain anesthesia cases owing to a variety of reasons--both published and unpublished. Please do not write on these patient's charts.
3. Attire: First impressions are very important. You must wear a clean lab jacket when not in the operating room and professional attire at all times. Name tags must be worn at all times. You must follow the guidelines relative to head, face, and foot coverings as established and determined by your institution.
4. Sharps: When using sharp instrumentation, all sharps including needles and/or other invasive modalities must be properly disposed of. This is the responsibility of the person performing the procedure and you must take care to remove all sharp instruments in order to avoid injury to your co-workers.
5. Keys to good care: You should be aware of the physical, mental, and laboratory status of all patients in whose care you may anticipate. Constantly reassess your patients and update them of their status in the process as appropriate. Your attending physician should be able to easily access information through you. In short, take full responsibility for all aspects of the patient's care.

## **COLLEGE PROGRAM OBJECTIVES**

In addition to the above course-specific goals and learning objectives, this clerkship rotation also facilitates student progress in attaining the College Program Objectives. Please refer to the complete list provided on the MSUCOM website here: <https://com.msu.edu/about-us/accreditation/program-overview>. From this website, you may find the Program Level Educational Objectives more definitively outlined here: <https://com.msu.edu/application/files/3115/5613/8820/Program-Level-Educational-Objectives-KSA.pdf>.

## STUDENT RESPONSIBILITIES

During the weeks of the rotation, the student is required to meet clinical and academic responsibilities:

- *The student **will** meet the following **clinical responsibilities** during this rotation:*
  - Students are expected to function collaboratively on health care teams that include health professionals from other disciplines in the provision of quality, patient-centered care.
  
- *The student **will** meet the following **academic responsibilities** during this rotation:*
  - Students are expected to identify, access, interpret and apply medical evidence contained in the scientific literature related to patients health problems.
  - Students are expected to: assess their personal learning needs specific to this clinical rotation, engage in deliberate, independent learning activities to address their gaps in knowledge, skills or attitudes; and solicit feedback and use it on a daily basis to continuously improve their clinical practice.

## ROTATION CLINICAL REQUIREMENTS

Requirements	Submission Method	Due Date
Attending Evaluation of Rotation*the determination of a satisfactory attending evaluation is governed by the College’s Policy for Retention, Promotion, and Graduation*	To be appropriately submitted per the instructions at the end of each evaluation form	Final Day of Rotation
Student Evaluation of Rotation	“Evaluate” Link in Clerkship Schedule (this link will activate on the final Monday of the rotation)	Final Day of Rotation
Activity Log	Submit via the Dropbox in D2L	By 11:59 pm the last day of the rotation

## **Activity Log**

Students are required to submit via D2L Dropbox an Activity Log by 11:59 pm the last day of the rotation.

In this log you will need to outline all of the Procedures you either assisted or watched, the Primary Diagnosis of each patient seen, all meetings or lectures (including didactics) and all materials you read while on the rotation.

The complete Activity Log can be viewed on page 15 of this syllabus or under the Activity Log Module on D2L for this course.

## **ROTATION EVALUATIONS**

### **Attending/Faculty/Resident Evaluation of Student**

Students are responsible for assuring that his/her clinical supervisor receives the appropriate evaluation form. Forms can be accessed via the "Attending Evaluation" link in the student's Clerkship schedule: [http://hit-filemakerwb.hc.msu.edu/Clerkship/login\\_student.html](http://hit-filemakerwb.hc.msu.edu/Clerkship/login_student.html).

Students should assertively seek feedback on his/her performance throughout the course of the clinical rotation. Students should also sit down and discuss the formal evaluation with the clinical supervisor. Note that the clinical supervisor and the DME from the rotation hospital are required to sign the form.

It is important to know that evaluations will not be accepted by the Office of Student Services if submitted by the student.

Any evidence of tampering or modification while in the possession of the student will be considered "unprofessional behavior" resulting in an "N" grade.

### **Student Evaluation of Rotation**

Students will submit their rotation evaluations electronically at the conclusion of every rotation by accessing the evaluation system at:

[http://hit-filemakerwb.hc.msu.edu/Clerkship/login\\_student.html](http://hit-filemakerwb.hc.msu.edu/Clerkship/login_student.html)

## **OSS 655 Corrective Action Policy**

There is no Corrective Action Policy or Plan as there are no graded components to the OSS 655 rotation. All items with the exception of the attending evaluation are under the direct control of the student and there is no reason that they cannot be completed in a timely fashion. If the student has an extension in the rotation due to some verifiable reason, then they will receive this same extension for submitting the required end of rotation paperwork.

**IMPORTANT NOTE:** Attending evaluations do not follow the above “Corrective Action” process. Marginal Attending Evaluations will be reviewed on a case-by-case basis by the department, where the Instructor of Record will then determine whether to give the student a Pass or an No Grade for the rotation. If the department determines students will be given an N grade in light of the evaluation, they will then proceed to the “MICHIGAN STATE UNIVERSITY COLLEGE OF OSTEOPATHIC MEDICINE POLICY FOR RETENTION, PROMOTION, AND GRADUATION FOR THE DOCTOR OF OSTEOPATHIC MEDICINE DEGREE” process  
[https://com.msu.edu/application/files/1415/6104/4636/MSUCOM\\_Student\\_Handbook.pdf](https://com.msu.edu/application/files/1415/6104/4636/MSUCOM_Student_Handbook.pdf)

## **Student Responsibility and Requirements**

### **MSU EMAIL**

To facilitate communication from faculty and staff to students, students are required to have a functioning MSU email address. Students are responsible for checking their MSU email accounts daily and maintaining their MSU mailboxes so that messages can be received. Forwarding MSU email to another email account or failure to check email are not valid excuses for missing a deadline or other requirements of the clinical education program.

Further, students must use secure email when working in a hospital, clinic or other health care setting if discussion of patient information is involved. MSUNet (msu.edu) email is secure; many web-based email systems including Hotmail, Gmail and Yahoo are not.

### **END OF ROTATION EXAMS**

MSUCOM Department of Osteopathic Surgical Specialties does not give an End of Rotation Examination for their Selective/Elective Rotations. Students in their fourth year should be preparing for COMLEX 2 CE and PE during their rotations and maximize your knowledge regarding this clerkship rotation’s field of surgery.

# MSU College of Osteopathic Medicine Standard Policies

The following are the standard MSUCOM policies students must adhere to across rotations.

## Clerkship Attendance Policy

In order to gain the knowledge and skills to successfully complete the MSUCOM clerkship program, consistent participation/attendance in program activities is essential. Any time off must not interfere with the quality of the rotation.

1. In the event a student needs to be absent from any rotation for the reasons listed below and permissible by the rotation syllabus, students may request time off.
2. Any absence (unless emergent) must be approved in advance (at least 30 days) of absence by the medical education department (student coordinator/director or DME), utilizing the Clerkship Program Excused Absence Request Form.
3. A student may not be absent more than 2 days on any one 4 week rotation (no time off allowed for rotations of 2 weeks or less) for the reasons below (exception Interview absences or Conference absences as below).
4. Any additional time off any one rotation must be approved by the MSUCOM Instructor of Record for the course the absence will occur.

### **Absence due to interviews:**

For the purpose of interviewing only, a student may be absent 4 days on a 4 week rotation (2 days on a 2 week rotation) during the months of September to January in the OMS year 4. Interview invitations must accompany the Clerkship Program Excused Absence Request Form.

### **Absence due to examinations:**

<b>Examination</b>	<b>Maximum Time Off (includes travel time)</b>
COMLEX USA Level 2 CE/USMLE Step 2 CK/Canadian MCCEE	1 day
MSUCOM COMLEX PE Simulation at MSU	1 day for each scheduled simulation
COMLEX USA Level 2 PE/USMLE Step 2 CS(Canadian Students Only)	2 days
COMAT/SHELF examinations	Travel time and time for exam

### **Personal Day Absence:**

Students are allowed 5 personal days per academic year in OMS 3 and OMS 4. These days are not carried over from third year to fourth year. These are to be used for illness, physician appointments, and special events (weddings, graduations, special anniversary events) and must not exceed 2 days on any 4 week rotation (#3 above). Prolonged illness and bereavement will be handled on a case by case basis between MSUCOM Director of Clerkship and the base hospital/medical education department. Students must notify rotation team and medical education of emergent/illness absences on day of absence.

Hospital organized community events that might lead to periodic absence from rotations – student participation is encouraged and if base hospital approved, would be considered part of the rotation and not a personal day absence.

Jury duty – when obligated, student participation is not considered a personal day.

Court excuses must accompany any absence. If absence is prolonged, this will be handled on a case-by-case basis between the base hospital/medical education and MSUCOM.

**Conference Absence:**

While on required/core rotations, no excused absences for any professional meeting will be allowed unless the student is presenting research in which they have participated.

- a. Appropriate paperwork with proof of presentation and copy of conference agenda must accompany the form.
- b. Time off in this situation will be for travel and presentation only.

While on selective/elective rotations: A student may submit a request for an excused absence to attend one (1) professional meeting, time not to exceed 3 days off rotation. The meeting agenda must accompany the Clerkship Program Excused Absence Request Form <https://com.msu.edu/application/files/1215/7426/0230/Clerkship-Absence-Request-Form.pdf>

Personal vacations/family reunions, etc are not part of this policy. Vacations can be scheduled periodically, provided all curriculum requirements will be met, with the assistance of your Student Services Advocate. Vacations will not be permitted on any core rotation or elective rotation.

## **Policy for Medical Student Supervision**

### **Supervisors of the Medical Students in the Clinical Setting**

The MSUCOM curriculum includes required clinical experiences in a variety of clinical learning environments. The role of the student is to participate in patient care in ways that are appropriate for the student's level of training and experience and to the clinical situation. The student's clinical activities will be under the supervision of licensed physicians. This supervising physician may delegate the supervision of the medical student to a resident, fellow, or other qualified healthcare provider, however, the supervising physician retains full responsibility for the supervision of the medical students assigned to the clinical rotation and must ensure his/her designee(s) are prepared for their roles for supervision of medical students.

The physician supervisor and his/her designee(s) must be members in good standing in their facilities and must have a license appropriate to his/her specialty of practice and be supervising the medical student within that scope of practice as delineated by the credentialing body of the facility.

### **Level of Supervision/Responsibilities**

Clinical supervision is designed to foster progressive responsibility as a student progresses through the curriculum, with the supervising physicians providing the medical student the opportunity to demonstrate progressive involvement in patient care. MSUCOM students will be expected to follow clinical policies of the facility regarding medical records and clinical care. Medical student participation in patient history/physical exam, critical data analysis, management, and procedures will include factors, but not limited to:

- The students demonstrated ability
- The students level of education and experience

- The learning objectives of the clinical experience

First and second year medical students will be directly supervised at all times (supervising physician or designee present or immediately available).

Third and fourth year medical students will be supervised at a level appropriate to the clinical situation and student's level of experience. For some tasks, indirect supervision may be appropriate for some students. Direct supervision would be appropriate for advanced procedures.

Supervising physicians will provide medical students with timely and specific feedback on performance. The supervising physician will complete a mid-rotation evaluative discussion with the medical student. Supervising physicians will complete a summative evaluation and are encouraged to contact the course/clerkship director with any gaps in student performance.

Medical students with any concern regarding clinical, administrative, and educational or safety issues during his/her rotation will be encouraged to contact the supervising physician or clerkship/course director

## **Student VISA**

Michigan State University is committed to providing equal opportunity for participation in all programs, services, and activities. Requests for accommodations by persons with disabilities may be made by contacting the Resource Center for Persons with Disabilities (RCPD) at 517-884-RCPD, or on the web at [www.rcpd.msu.edu](http://www.rcpd.msu.edu). Once a student's eligibility for (clinical and/or testing) accommodation has been determined, the student may be issued a Verified Individualized Services and Accommodation (VISA) form. Students must present this VISA form to the Clerkship Team ([COM.Clerkship@msu.edu](mailto:COM.Clerkship@msu.edu)), A-332 East Fee Hall, at the start of the semester in which they intend to use their accommodations (for tests, projects, labs, etc.). Accommodation requests received after this date will be honored whenever possible.

If updates or modifications to an existing VISA form are made after the semester begins, it is the responsibility of the student to submit an updated version to the Clerkship Team ([COM.Clerkship@msu.edu](mailto:COM.Clerkship@msu.edu)) if he or she intends to use the new accommodation going forward.

## **STATEMENT OF PROFESSIONALISM**

Principles of professionalism are not rules that specify behaviors, but guidelines that provide direction in identifying appropriate conduct. These principles include the safety and welfare of patients, competence in knowledge and skills, responsibility for consequences of actions, professional communication, confidentiality, and lifelong learning for maintenance of professional skills and judgments.

Professionalism and professional ethics are terms that signify certain scholastic, interpersonal and behavioral expectations. Among the characteristics included in this context are the knowledge, competence, demeanor, attitude, appearance, mannerisms, integrity and morals displayed by the student to faculty, peers, patients and colleagues in other health care professions. Students are expected to conduct themselves at all times in a professional manner and to exhibit

characteristics of a professional student.

## **STUDENTS RIGHTS AND RESPONSIBILITIES**

Each individual student is responsible for their behavior and is expected to maintain standards of academic honesty. Students share the responsibility with faculty for creating an environment that supports academic honesty and principles of professionalism. Proper relationship between faculty and student are fundamental to the college's function and this should be built on mutual respect and understanding together with shared dedication to the education process. It is a fundamental belief that each student is worthy of trust and that each student has the right to live in an academic environment that is free of injustice caused by dishonesty. While students have an obligation to assist their fellow students in meeting the common goals of their education, students have an equal obligation to maintain the highest standards of personal integrity.

## **FACULTY RESPONSIBILITIES**

It is the responsibility of the college faculty to specify the limits of authorized aid (including but not limited to exams, study aids, internet resources and materials from senior students) in their syllabi, and it is the responsibility of students to honor and adhere to those limits. Course instructors shall inform students at the beginning of the semester of any special criteria of academic honesty pertinent to the class or course.

It is the responsibility of the clinical faculty to provide students with ongoing feedback during rotation upon request. Clinical faculty are generally recommended (though not required) to limit student assigned duty hours from 40 to 60 hours weekly (and not exceeding 60 hours). Both faculty and students are to be treated fairly and professionally in order to maintain a proper working relationship between trainer and trainee.

## **COURSE GRADES**

- **P-Pass** – means that credit is granted and that the student achieved a level of performance judged to be satisfactory according to didactic and clinical performance by the department.
- **N-No Grade** – means that no credit is granted and that the student did not achieve a level of performance judged to be satisfactory to be satisfactory according to didactic and clinical performance by the department.
- **ET-Extended Grade** – means that a final grade (“Pass” or “No Grade”) cannot be determined due to one or more missing course requirements. In Years 3 and 4, the ET grade is used instead of an “Incomplete (I)” grade. Once all course requirements have been completed, received, and processed, the ET grade will be changed to a final grade. An “ET” will NOT remain on a student’s transcript.

## **EXPOSURE INCIDENTS PROTOCOL**

You must notify your attending and the DME Office of your base institution of the incident. A form has been developed by the University to report exposure incidents. These forms should be on file in your DME's office. While on rotations that occur outside of the base hospital system notify your attending immediately of any exposure and follow the MSU procedure for evaluation and treatment. Please make yourself familiar with the procedure and the form.

<https://com.msu.edu/current-students/clerkship-medical-education/injury-and-property-damage-reports>

# ACTIVITY LOG

## Pain Management Medicine Rotation

**Student Name:**

**Base Hospital:**

**Rotation Dates:**

Please note you will be required to make an entry or more per day you are on the rotation. In addition,

- Give as many details regarding the procedures you were involved with
- Give as many details regarding the primary diagnosis of the patients seen
- Complete the Meetings/Lectures portion as applicable
- Specify the readings you completed while you were on the service

\*\*\*Please note that extra lines can be added to each log by tabbing after last column\*\*\*

**Please list all procedures observed:**

Procedure	Date	Surgeon

**Please list Primary Diagnosis of Patients Seen:**

Primary Diagnosis	Date	Clinic / Hospital

**Please list all meetings and Lectures attended**

Meeting / Lecture	Date	Topic

**Please list all reading materials read on the rotation:**

Material	Topic

When completed, please upload to the Dropbox on D2L.
