

CONFLICT OF INTEREST RESOLUTION

Name of Person with Conflict of Interest:

CME Activity and Date:

Activity Director or Reviewer

If current conflicts of interest are present, the person overseeing CME content completes this section.

To assure independence and balance of content, current conflicts of interest were resolved by the following process:

No Resolution Required: Speaker topic and presentation are not pertinent to the speaker's disclosed financial relationship(s) with commercial interest(s).

Peer Evaluation: The activity director or knowledgeable clinician reviewed the content prior the start of the presentation.

- Review did not require changes to the content
- The following changes were made to the content:

Independent Content Validation:

1. Content is valid and aligned with the interests of the public;
2. All recommendations involving clinical medicine are based on best available evidence;
3. All scientific research referred to, reported, or used in the CME activity in support or as justification of patient care recommendations conforms to the generally accepted standards of experimental design, data collection, and analysis.

Altered Control Over Content:

- Designated someone else to control that part of the content
- Changed the content of the person's assignment
- Limited content to a report without recommendations
- Changed the focus of the CME activity
- Limited sources for recommendations

Elimination: Activity Directors, planning committee members and/or teachers/authors who were perceived as either manifesting conflicts of interest or being biased will be eliminated from consideration as resources in subsequent CME programs.
