

GERIATRIC FELLOWSHIP TRAINING MODULE: HOSPICE & PALLIATIVE CARE

CORE COMPETENCY (AOA & ACGME)	OBJECTIVES <i>The geriatric fellow will:</i>	INSTRUCTIONAL STRATEGY	OPTIMAL AGING COMPONENT	CONTENT & RESOURCES	EVALUATION METHODS
Osteopathic Principles & Practice	<ol style="list-style-type: none"> 1. Describe the integration of Osteopathic principles and philosophy into the care of older adults toward the end of life (EOL). 2. Describe the musculoskeletal changes that occur with normal and pathological aging. 3. Recognize the limitations necessary to consider when performing OMT on individuals at the EOL. 4. Perform individualized OMT to treat acute or chronic symptoms. 5. Utilize caring, compassionate, holistic, person-centered behavior with older adults and their families. 6. Role model caring for the “whole person” versus merely treating symptoms. 	<ul style="list-style-type: none"> • SDPC • W/COM • CP • RC • IR • D 	<ul style="list-style-type: none"> ▪ Discuss the capacity of older adults to function across many domains – physical, functional, cognitive, emotional, social & spiritual. ▪ Describe the use of selection, optimization, and compensation that older adults use to adapt to life’s challenges. 	<ul style="list-style-type: none"> ▪ Komara ▪ Ward ▪ Williams 	<ul style="list-style-type: none"> • PRR • ORAL • SP • S/M • OSCE • 360° • JC <p style="text-align: center;">PORTF</p>
Medical Knowledge	<ol style="list-style-type: none"> 1. Demonstrate knowledge of established and evolving biomedical, clinical, 	<ul style="list-style-type: none"> • SDPC 	<ul style="list-style-type: none"> ▪ Define optimal aging. 	<ul style="list-style-type: none"> ▪ Billings & Block ▪ Brummel-Smith 	<ul style="list-style-type: none"> • CSR

CORE COMPETENCY (AOA & ACGME)	OBJECTIVES <i>The geriatric fellow will:</i>	INSTRUCTIONAL STRATEGY	OPTIMAL AGING COMPONENT	CONTENT & RESOURCES	EVALUATION METHODS
	<p>epidemiological, and social-behavioral sciences in Hospice and palliative care settings and facilities.</p> <p>2. Utilize pharmacologic narcotic principles at the EOL for:</p> <ul style="list-style-type: none"> • Assessment of pain, constipation, dyspnea • Titration of narcotics • Side effects • Prevention of side effects and adverse drug reactions (ADR) <p>3. Utilize evidence-based prognostication tools to determine prognosis in cancer and non-cancer illnesses.</p> <p>4. Apply the Hospice Medicare benefit structure to patient care.</p> <p>5. Utilize educational resources available in EOL care.</p> <p>6. Utilize medical knowledge to teach others.</p> <p>7. Incorporate clinical questions and cases for</p>	<ul style="list-style-type: none"> • AGS-FT • CP • IR • D 	<ul style="list-style-type: none"> ▪ Compare/contrast optimal aging to successful aging. ▪ Describe the eight (8) determinants of health (Health Field Model). ▪ Recognize the unique individuality of older adults across cohorts and the continuum of care. ▪ Utilize exercises that promote optimal aging and improve balance and strength. ▪ List the primary 	<p>(2 articles)</p> <ul style="list-style-type: none"> ▪ Fox ▪ GRS7: Chapter 2 – Biology of Aging ▪ GRS7: Chapter 16 – Hospital Care ▪ Hazzard ▪ Kane ▪ POGOe ▪ AGS – Pain (2 articles) ▪ EPEC ▪ OEPEC ▪ Cognitive Tools ▪ Prognostication Tools 	<ul style="list-style-type: none"> • ORAL • MCQ • LOG • PORTF • JC

CORE COMPETENCY (AOA & ACGME)	OBJECTIVES <i>The geriatric fellow will:</i>	INSTRUCTIONAL STRATEGY	OPTIMAL AGING COMPONENT	CONTENT & RESOURCES	EVALUATION METHODS
	discussion and research. 8. Observe and participate in the role and responsibilities of the hospice or palliative care physician/provider.		biological activities/factors known to increase the chance of aging optimally (exercise, nutrition, sleep, avoidance of disease-causing agents, practicing preventive medicine, early treatment of disease and medical conditions, avoidance of iatrogenic complications).		
Patient Care	1. Provide person-centered care that is compassionate, appropriate, and effective for the treatment of the dying. 2. Obtain a patient history and perform a physical examination pertinent to	<ul style="list-style-type: none"> • SDPC • CP • IR • D 	<ul style="list-style-type: none"> • Promote optimal nutrition. • Promote optimal cognitive health and function. 	<ul style="list-style-type: none"> ▪ POGOe - Drugs and Aging ▪ Beers ▪ Hazzard 	<ul style="list-style-type: none"> • 360° • PRR • CSR • OSCE

CORE COMPETENCY (AOA & ACGME)	OBJECTIVES <i>The geriatric fellow will:</i>	INSTRUCTIONAL STRATEGY	OPTIMAL AGING COMPONENT	CONTENT & RESOURCES	EVALUATION METHODS
	<p>the terminal diagnosis and level of comfort.</p> <ol style="list-style-type: none"> 3. Demonstrate comfort and a compassionate demeanor when interacting with dying patients. 4. Assess and provide initial management of pain and key non-pain symptoms based on the patient's goals of care. 5. Evaluate medications for contribution to patient comfort while at the same time respecting the financial limitations of the hospice philosophy. 6. Order testing in a medically appropriate and fiscally responsible manner to affect patient comfort. 7. Assess, develop, and implement patient management plans for the dying patient including: <ul style="list-style-type: none"> • Loss of appetite • Weight loss • Edema • Dysphagia • Terminal congestion 		<ul style="list-style-type: none"> • Recognize social support systems as a critical factor in patient outcomes. • Incorporate knowledge of the benefits of social engagement and interaction in patient treatment plans. 	<ul style="list-style-type: none"> ▪ Kane ▪ Lo ▪ Touro University, (2008, August). <i>Ethical, legal and health-care related behaviors.</i> – Dr. Carron ▪ GRS7: Chapters 4, 15, 32, 33 	<ul style="list-style-type: none"> • S/M • PORTF

CORE COMPETENCY (AOA & ACGME)	OBJECTIVES <i>The geriatric fellow will:</i>	INSTRUCTIONAL STRATEGY	OPTIMAL AGING COMPONENT	CONTENT & RESOURCES	EVALUATION METHODS
	<ul style="list-style-type: none"> • Difficulty in breathing (DIB) • Debility 8. Identify the psychological, social, and spiritual needs of patients with advanced illness and include their family members. 9. Conduct advanced care planning. 10. Demonstrate competence in rendering care to the dying patient. 11. Explain aspects of the health care continuum and locations of hospice and palliative care services/facilities available.				
Interpersonal & Communication Skills	1. Demonstrate communication skills that are effective, therapeutic, and that result in the effective exchange of accurate and appropriate information while protecting the patient's rights (autonomy, confidentiality,	<ul style="list-style-type: none"> • SDPC • JC • RC • CP • IR • D 	<ul style="list-style-type: none"> • Avoid use of ageist and stereotypical language when communicating with older adults. 	<ul style="list-style-type: none"> • Buckman (3 resources) • CHAMP 	<ul style="list-style-type: none"> • 360° • PS • OSCE • SP/M • CL • PORTF

	<p>privacy.</p> <p>2. Present hospice and palliative care as a positive, hopeful, treatment option for a patient with advanced disease.</p> <p>3. Incorporate the use of effective team principles when working with patients, their families, hospice physicians, and professional associates.</p> <p>4. Utilize therapeutic and effective communication with patients, families, guardians across a broad range of socioeconomic, cultural, and religious backgrounds.</p> <p>5. Communicate effectively with physicians, other health professionals, and health related agencies, across the healthcare continuum.</p> <p>6. Participate in hospice</p>				

CORE COMPETENCY (AOA & ACGME)	OBJECTIVES <i>The geriatric fellow will:</i>	INSTRUCTIONAL STRATEGY	OPTIMAL AGING COMPONENT	CONTENT & RESOURCES	EVALUATION METHODS
	<p>and interdisciplinary team meetings and link patient needs to the appropriate team member.</p> <p>7. Demonstrate effective use of communication strategies including: Listening Asking questions slowly when needed Allowing a pause for time for patient to answer if needed.</p> <p>8. Establish the ability to manage difficult family issues/conflicts compassionately and effectively.</p> <p>9. Present history and physical data in a clear and concise manner.</p> <p>10. Maintain comprehensive, timely, and legible medical records all patients served during the Hospice/Palliative care rotation.</p> <p>11. Return family calls in a timely manner while</p>				

CORE COMPETENCY (AOA & ACGME)	OBJECTIVES <i>The geriatric fellow will:</i>	INSTRUCTIONAL STRATEGY	OPTIMAL AGING COMPONENT	CONTENT & RESOURCES	EVALUATION METHODS
	addressing patient/family concerns appropriately.				
Professionalism	<ol style="list-style-type: none"> 1. Consistently demonstrate compassion, integrity, and respect for others. 2. Demonstrate responsiveness to patient welfare that supersedes self-interest. 3. Incorporate respect for patient privacy, autonomy, and the doctor-patient relationship in providing EOL care. 4. Demonstrate life-long learning abilities with participation in journal club and other didactic sessions. 5. Discuss the interaction between medical/healthcare and spiritual, cultural, ethnic, sexual, and racial factors. 6. Incorporate CMS guidelines on patient privacy issues. 7. Participate in diversity awareness opportunities. 	<ul style="list-style-type: none"> • SDPC • Zemper • IR • CP • D 			<ul style="list-style-type: none"> • 360° • PS • ORAL • CSR • PRR • CL • PORTF

CORE COMPETENCY (AOA & ACGME)	OBJECTIVES <i>The geriatric fellow will:</i>	INSTRUCTIONAL STRATEGY	OPTIMAL AGING COMPONENT	CONTENT & RESOURCES	EVALUATION METHODS
	8. Utilize cultural competence to work compassionately with patients and families of varied cultures. 9. Apply ethical principles to EOL care.				
Practice-Based Learning & Improvement	1. Demonstrate the ability to investigate and evaluate care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and life long learning. 2. Identify strengths, deficiencies, and limits in one's knowledge and expertise. 3. Analyze personal practice utilizing quality improvement (QI) methods and implement practice improvement changes. 4. Utilize educational resources available in the EOL life care setting to assist in optimizing patient comfort.	<ul style="list-style-type: none"> • SDPC • AGS-FT • IR • D • SA 	<ul style="list-style-type: none"> • Advocate for public education and public policy that can influence health promotion and wellness for older adults at a local, state, and national level. 	<ul style="list-style-type: none"> • Hazzard • Kane 	<ul style="list-style-type: none"> • JC • PRR • CSR • 360° • PS • PORTF • SCS Research Training & Evidence Based Modules (Zemper)

CORE COMPETENCY (AOA & ACGME)	OBJECTIVES <i>The geriatric fellow will:</i>	INSTRUCTIONAL STRATEGY	OPTIMAL AGING COMPONENT	CONTENT & RESOURCES	EVALUATION METHODS
	5. Evaluate an EOL case for a M&M conference to self-evaluate care provided. 6. Complete all assigned readings and activities recommended by the attending in a timely manner.				
Systems-Based Practice	1. Demonstrate an awareness of and responsiveness to the larger context of the health care delivery systems, as well as the ability to call effectively on other resources in the system to provide optimal health care. 2. Coordinate patient care within the health care system and work in teams to enhance patient safety and improve the quality of patient care. 3. Incorporate cost awareness and risk-benefit analysis in patient care. 4. Describe the role and function of a positive team member within the hospice or palliative care team. 5. Discuss the limitations of	<ul style="list-style-type: none"> • SDPC • AA • CP • CM • IR • D 	<ul style="list-style-type: none"> • Become knowledgeable about community-based resources that promote optimal aging and refer/collaborate when appropriate for older adults discharging back to the community from the hospital 	<ul style="list-style-type: none"> • How to use an ethics committee • Ethics components • Hazzard • Kane • JCAHO • HIPAA • E & M 	<ul style="list-style-type: none"> • 360° • PS • MCQ • CL • PORTF

CORE COMPETENCY (AOA & ACGME)	OBJECTIVES <i>The geriatric fellow will:</i>	INSTRUCTIONAL STRATEGY	OPTIMAL AGING COMPONENT	CONTENT & RESOURCES	EVALUATION METHODS
	<p>hospice and palliative care.</p> <p>6. Incorporate correct E&M coding for hospice and palliative care services to maintain compliance with insurance regulations.</p> <p>7. Discern what services are available to the hospice and palliative care patient.</p> <p>8. Participate in advocacy activities that enhance the quality of patient care.</p> <p>9. Incorporate the rules and regulations that guide hospice and palliative care.</p>				

Potential Methods/Strategies of Instruction

ACRONYM	MEANING	EXPLANATION
AA	<ul style="list-style-type: none"> Advocacy Activity 	<ul style="list-style-type: none"> Participate in Michigan DO Day on the Hill Membership in professional organizations
AGS-FT	<ul style="list-style-type: none"> American Geriatrics Society. (2012). <i>Geriatrics at your fingertips</i> (14th ed.). Mechanicsburg, PA: Fry Communications. Retrieved from https://fulfillment.frycomm.com/ags/gayf/order_form.asp 	<ul style="list-style-type: none"> Provides accessible, concise information for healthcare professionals caring for older adults with complex, chronic diseases and disorders; current medication use; clinical guidelines; calculators; assessment instruments; algorithms
CC	<ul style="list-style-type: none"> Care Conference 	
CM	<ul style="list-style-type: none"> Case Management 	<ul style="list-style-type: none"> Case management is a multi-step process to ensure timely access to and coordination of medical and psychosocial services patients, and, in some instances, the family or close support network CM can include: intake/history, needs assessment, developing plan of care, developing mutual goals, treatment plan implementation, service coordination, monitoring, follow-up, reassessment, case conferencing, crisis intervention, and case closure
CP	<ul style="list-style-type: none"> Case Presentation (oral) 	<ul style="list-style-type: none"> The Oral Case Presentation is an art form that requires effort and repeated practice The purpose is to concisely summarize the patient's presentation: (1) history, (2) physical examination, (3) laboratory results,

ACRONYM	MEANING	EXPLANATION
		and (4) your understanding of these findings (clinical reasoning)
D	<ul style="list-style-type: none"> • Didactic Content 	<ul style="list-style-type: none"> • A didactic method is a basic component of education • Related to the teaching-learning process it includes delivery of information, engaging the learner, and completion of a variety of activities that help to maintain the learned concepts • Lecture
GRSC	<ul style="list-style-type: none"> • Geriatric Review Syllabus Didactics 	The geriatric fellow will participate in weekly didactics based on the Geriatrics Review Syllabus; held _____ (for example - Wednesday afternoons at 1600)
JC	<ul style="list-style-type: none"> • Journal Club 	<ul style="list-style-type: none"> • Provides a forum for keeping abreast of new developments in a particular content area • Promotes engagement, interaction and scholarly dialogue • Approached in a systematic fashion with emphasis on key elements • Helps in development of oral and written presentation skills • Assists in mastery of critical appraisal
IC	<ul style="list-style-type: none"> • Independent Collaboration/Consultation 	<ul style="list-style-type: none"> • Telephone conversations <ul style="list-style-type: none"> ○ Pharmacy, home care, Hospice, Office on Aging (local), home visit, Adult Protective Services
IDT	<ul style="list-style-type: none"> • Interdisciplinary Team Meetings 	<ul style="list-style-type: none"> • An approach to patient care that includes a variety of professionals with knowledge/expertise in an aspect of person-

ACRONYM	MEANING	EXPLANATION
		centered care that leads to quality care of individuals and their families; need to know the credentials, scope of practice, and function of each member of the health care team
ITC	<ul style="list-style-type: none"> • Interdisciplinary Team Conference 	The geriatric fellow will participate in interdisciplinary team conferences for selected patients
IR	<ul style="list-style-type: none"> • Independent Reading 	<ul style="list-style-type: none"> • Selected readings based on the fellow's needs are assigned by supervising attending physicians • Fellows are also referred to standard textbooks and are expected to independently research topics related to specific patient encounters
M	<ul style="list-style-type: none"> • Meetings 	<ul style="list-style-type: none"> • Can include: <ul style="list-style-type: none"> ○ Administrative ○ Behavior management ○ CQI ○ Falls ○ Infection control ○ Weight loss ○ Wounds
RC	<ul style="list-style-type: none"> • Record Completion 	<ul style="list-style-type: none"> • Patient medical record – written or electronic - maintained accurately, efficiently, and thoroughly according to acceptable standards for documentation
SA	<ul style="list-style-type: none"> • Scholarly Activity 	<ul style="list-style-type: none"> • Professional activity • Conference attendance/presentation • Poster presentation

ACRONYM	MEANING	EXPLANATION
		<ul style="list-style-type: none"> • Publication: journal, newsletter • Quality improvement (QI) project • Research
SDPC	<ul style="list-style-type: none"> • Supervised Direct Patient Care 	<ul style="list-style-type: none"> • Forms the majority of the training experience, which includes: <ul style="list-style-type: none"> ○ Bedside Rounds (BR) ○ Morning Report (MR)
W/COM	Workshop	<ul style="list-style-type: none"> • Combination of demonstration, hands-on-experience/practice, reading • Provided by College of Osteopathic Medicine faculty • Held annually
Zemper	Modules developed for _____	<ul style="list-style-type: none"> • Research

Potential Methods of Evaluation

ACRONYM	MEANING	EXPLANATION
360°	<ul style="list-style-type: none"> • 360° Global Rating 	<ul style="list-style-type: none"> • A comprehensive (but labor intensive) assessment using brief instruments with 3-4 Likert scale questions completed by nursing staff, attendings, peers and patients • Ideally, a minimum of 10 responses from each category of evaluator
CL	<ul style="list-style-type: none"> • Checklist 	<ul style="list-style-type: none"> • Assessment items that are used to record whether intended behaviors were observed by an assessor • Typical checklist responses are dichotomous (“done” or “not done”) but may use more categories (e.g. “done”, “partially done”, or “not done”) • Rater training is critical so that each rater scores observed behaviors correctly and consistently
CSR	<ul style="list-style-type: none"> • Chart Stimulated Recall 	<ul style="list-style-type: none"> • A standardized oral exam using examinees’ patients’ records • Allows the examiner to ask questions about clinical diagnosis and management based on actual patient records
GR	<ul style="list-style-type: none"> • Global Rating 	<ul style="list-style-type: none"> • Rating scales that rate performance as an integrated whole • For example, “Overall this performance was: excellent, very good, good, marginal, unsatisfactory”
GS/DL	<ul style="list-style-type: none"> • Geriatric Syndrome/Disease Log 	<ul style="list-style-type: none"> • Log of patients seen, focusing on syndromes/diseases treated • Used to assess range and volume of syndromes/diseases treated in comparison with required minimums
JC	<ul style="list-style-type: none"> • Journal Club 	<ul style="list-style-type: none"> • Presentation to peers and faculty of critique of a research journal article • Can be evaluated using the SCS Journal Club Checklist, and added to portfolio
MCQ	<ul style="list-style-type: none"> • Multiple-choice question written examination 	<ul style="list-style-type: none"> • Objective examination of factual knowledge • Easy to administer and score, but takes some effort to develop appropriate questions and distractors

ACRONYM	MEANING	EXPLANATION
ORAL	<ul style="list-style-type: none"> Standardized Oral Examination 	<ul style="list-style-type: none"> An oral examination comprised of specific questions given to all examinees and scored by examiners using previously agreed upon guidelines
OSCE	<ul style="list-style-type: none"> Objective Structured Clinical Examination 	<ul style="list-style-type: none"> An assessment format that consists of a series of performance tests Each test within an OSCE is called a “station” Often uses simulations or models or standardized patients
P/CL	<ul style="list-style-type: none"> Procedure or Case Logs 	<ul style="list-style-type: none"> Log of patients seen, focusing on cases treated and specific procedures performed Used to assess range and volume of cases and procedures performed in comparison with required minimums
PORTF	<ul style="list-style-type: none"> Portfolio 	<ul style="list-style-type: none"> In assessment, a collection of evidence (either electronic or hardcopy) of progression towards proficiency (e.g. in the core competencies) Portfolios typically include both constructed components (selected by the program or faculty) and unconstructed components (selected by the learner)
PRR	<ul style="list-style-type: none"> Patient Record Review 	<ul style="list-style-type: none"> Review of patient records to assess range and volume of cases seen and appropriateness of care provided by a fellow
PS	<ul style="list-style-type: none"> Patient Survey 	<ul style="list-style-type: none"> Survey instrument directed at patients to assess satisfaction with care received Normally a brief series of Likert scale questions, open-ended questions, or a combination of both
S/M	<ul style="list-style-type: none"> Simulations and Models 	<ul style="list-style-type: none"> Simulations (mechanical devices) or models (human actors) for training or evaluation purposes Focused on a specific medical problem or procedure
SP	<ul style="list-style-type: none"> Standardized Patient 	<ul style="list-style-type: none"> Actors trained to play the roles of patients, portray specific cases, and rate performance of the learner Often used in OSCE stations
