Notice to Students: Although course syllabi at MSUCOM have a consistent format, vitally important details differ by course. For this reason, you must read the syllabus thoroughly at the onset of each course to know what the course will provide and what is expected of you.

Section 1 – Course Information

Course Description
OST579 is a 9-credit hour course that provides students with a multidisciplinary study of the cardiovascular system in health and disease.

Course Goals
1. To provide a comprehensive presentation of normal and abnormal cardiovascular structure and function
2. To give the student a basic understanding of the diagnosis and clinical management of the major cardiovascular disorders
3. Class time will be used for lectures, workshops, laboratory sessions, review sessions, and quizzes as indicated on the attached schedule.

To prepare the student for a lifetime of self-study as a physician, OST 579 is employing active learning with increased student participation in the learning process. This is being accomplished via:

- Assigned readings to complement formal lectures for which the student will be held responsible in the evaluation process.
- Computer assisted interactive learning listed later in Supplemental Materials.

Please note that specific instructional objectives are provided within each lecture or other learning activity of this course.

Measurable Course Objectives
The American Osteopathic Association has identified osteopathic core competencies (OCC) essential for your practice as a future osteopathic physician (reference). These are embedded throughout our programmatic objectives and curriculum. Our curricular structure also encourages your proficiency in the Core Entrustable Professional Activities (EPAs) for Entering Residency as defined by the Association of American Medical Colleges to help you build toward that future phase of your journey toward medical practice (reference). By the end of this specific course, you should be able to achieve the following objectives within each domain indicated:

Medical Knowledge
1. Summarize anatomical and physiological structure-function relationships in the cardiovascular system to differentiate between normal and abnormal function. This includes the heart, arteries, veins, capillaries, etc. (Biomedical Science - Anatomy/Physiology)
2. Examine the physiologic basis of health and the pathophysiologic basis of disease through selected cardiovascular clinical presentations such as heart disease and failure, heart arrhythmias and murmurs, hypertension and vasculitis, arterial diseases, etc. (Biomedical Science - Pathology/Pathophysiology)
3. Explain the rationale for recommending classes of drugs, vaccines, and nutritional factors for the prevention, management, and treatment of common cardiovascular disorders, considering the mechanism of action, indications, contraindications, drug-drug interactions, and side effects or adverse reactions of each intervention. (Biomedical Science - Pharmacology)
4. Explore common cardiovascular presentations that intersect with clinical disciplines. *(Clinical Science - Internal, Clinical Science - Family, Clinical Science - Pathology, Clinical Science - Emergency, Clinical Science - Radiology, Clinical Science - Obstetrics/Gynecology, Clinical Science - Preventive/Occupational, etc.)*

Osteopathic Principles, Practice, and Manipulative Medicine

5. Apply osteopathic principles such as the osteopathic tenets and the values of holistic, person-centered care to the study of the cardiovascular system. Examples include discussion of individual risk factors, comorbidities, characteristics, behaviors, etc. This includes training related to osteopathic manipulative medicine. *(OPP Principles/Integration, OMM/OMT Integration)*

Patient Care and Procedural Skills

6. Recommend and interpret common diagnostic and screening tests related to the assessment of cardiovascular disorders (ECG/EKG, stress test, echo/TTE, PET scan, tilt table, x-ray, CT scan, MRI, lipid profile, nuclear imaging, etc.) using evidence-based and cost-effective principles. *(Diagnostic Testing - EPA 3)*

7. Practice developing an evidence-based, cost-effective, patient-centered care plan to assess and manage selected cardiovascular clinical presentations such as heart disease and failure, heart arrhythmias and murmurs, hypertension and vasculitis, arterial diseases, etc. *(Treatment/Management - EPA 4)*

Professional Development and Reflection Skills

Additionally, the American Osteopathic Association indicates several other competencies on which professional development and reflection across time will foster effective medical practice. These include the ability to work collaboratively as part of an interprofessional team; the maintenance of an inquisitive and scientific approach to learning and medical practice; and the adoption of self-direction in lifelong learning and clinical decision-making. This course will contribute to the development of these longitudinal competencies or skills as indicated:

Self-Directed and Lifelong Learning

It is a goal at MSUCOM to promote self-directed learning to help our students grow into strong, self-directed future clinicians. Self-directed learning is also required by medical school accreditation standards. It is a 4-step process that occurs within an encapsulated timeframe. OST 579 is organized into 4 units, which begin with presentation of related learning objectives and end with a course examination. The first three units span 2 weeks, while the last is longer and spans a holiday break. Across these units, you will see the 4 steps of self-directed learning take shape as follows:

1. **Self-Assessment of Learning Needs** – Units begin with the presentation of learning objectives, providing opportunities to attend related learning events and to engage in guided self-study with related learning resources. Students are verbally encouraged at various points across the unit to reflect upon their knowledge, skills, and comfort related to learning objectives, identifying related learning needs.

2. **Identification, Analysis, & Synthesis of Information** – As students gain a sense of their learning needs, they are provided regular opportunities to interact with faculty to resolve these needs. This often occurs in weekly designated “Q&A overtime sessions,” in which faculty make themselves available for student-driven questions related to content and skills.

3. **Appraisal of Information Credibility** – Once students have synthesized their knowledge from learning activities and engaged in additional opportunities to meet learning needs as necessary, they have opportunity to appraise and apply their knowledge in collaborative sessions at the
end of the unit. These are often characterized as review/help sessions, Bootcamps, or Grand Rounds-style case activities. Students are verbally encouraged to reflect on whether their learning needs have been met in relation to the course objectives.

4. **Feedback on Information-Seeking Skills** – Finally, students are provided with two opportunities for feedback at the end of each unit. The first is a formative, individual assessment completed on the Friday following review or application sessions. Students are able to take the assessment, view their scores, hear the related rationale for correct and incorrect responses, and ask clarifying questions. Over the weekend, the students can use the feedback to focus their studies. Then, the summative course exam is completed on the Monday following the unit, providing students with another point of feedback to inform related study.

**College Program Objectives**

In addition to the above course-specific goals and learning objectives, this preclerkship course also facilitates student progress in attaining the College Program Objectives. Please refer to the complete list provided on the MSUCOM website [http://com.msu.edu/About/Accreditation/overview_of_program.htm](http://com.msu.edu/About/Accreditation/overview_of_program.htm).

**Course Coordinator**

*(Note - Preferred method of contact is shown in italics)*

Name: David Strobl, D.O.
Phone: 517-353-9515
Email: chambe27@msu.edu *(preferred method)*
Address: 965 Fee Rd, E Fee Hall Room A331, East Lansing, MI 48824

Lines of Communication

- For administrative aspects of the Course: general questions should be posted on the Discussion Board; for personal matters, you may contact the course coordinator directly.
- For content questions relating to a specific lecture or topic: please initially post all content questions under the specific faculty presenter on the Discussion Board. The Course Coordinator also monitors the discussion boards regarding content daily to insure a quick response.
- For absences/missed exams (see excused absence information below)
- Please set your notifications in D2L to immediate to receive posted News announcements. You may choose to receive notifications by email or SMS.

Office Hours
Questions of a personal nature may be discussed individually by making an appointment with Dr. Strobl, Academic Programs, via e-mail. There are no set office hours.

Course Web Site

The URL for the Course website is: [https://d2l.msu.edu](https://d2l.msu.edu)
Textbooks and Reference Materials

**Required**
- Lilly. Pathophysiology of Heart Disease, 7th ed., 2020, Lippincott, Williams & Wilkins

**Optional**
- Sadler. Langman’s Medical Embryology, 12th ed., 2012, Lippincott, Williams & Wilkins
- Harvey & Ferrier. Lippincott’s Illustrated Reviews: Biochemistry, 7th ed., 2017, Lippincott, Williams & Wilkins
  Section III:
  Chapter 25: Drugs Affecting Renal Excretory Function Chapter 26: Renin and Angiotensin
  Chapter 27: Treatment of Ischemic Heart Disease Chapter 28:
  Treatment of Hypertension Chapter 29: Therapy of Heart Failure Chapter 30:
  Antiarrhythmic Drugs Chapter 32: Blood Coagulation and Anticoagulant, Fibrinolytic, and Antiplatelet Drugs Chapter 33: Drug Therapy for Dyslipidemias
  Section III:
  Chapter 11: Antihypertensive Agents
  Chapter 12: Vasodilators & the Treatment of Angina Pectoris Chapter 13:
  Drugs Used in Heart Failure Chapter 14: Agents Used in Cardiac Arrhythmias Chapter 15: Diuretic Agents

Course-based Academic Support
The course faculty are here to facilitate your learning. The large number of students in this course (about 300) necessitates a degree of formality. Also, since your schedules are very full, we must adhere rigidly to the lecture, small group and lab times assigned to this course. However, within these constraints, the needs of individual students will be accommodated whenever possible. Please feel free
to contact the Course Coordinator with any personal issues you may have involving this course.

Additional academic support resources can be accessed here: MSUCOM Office of Academic Success and Career Planning.

Courses begin and end dates
OST579 begins on October 4, 2021 and ends on December 10, 2021. See addendum for detailed daily course schedule.

Exams/Assessments
The successful achievement of learning objectives will require knowledge and skills acquired in other portions of the overall MSUCOM educational program. Students will be expected to apply concepts and vocabulary learned in other courses to problem-solving for exams/assessments in this course. (MSUCOM Program Philosophy)

To maintain security of assessments, you may NOT post questions on the discussion board regarding exam questions or quiz questions. Kindly email your questions to the course coordinator.

There is a total of three mid-course exams and a cumulative Final Exam. Exam 1, Exam 2 and Exam 3 will each be worth 50 points. The lowest score will be dropped. This policy will hopefully relieve some of the test-taking performance anxiety and allow students to perform at their best. The policy was also adopted to cover all potential conflicts with exam scheduling, such as observance of a religious holiday, unexpected medical illness, and all other unforeseen absences. Students should plan on and are expected to take all exams and must obtain an excused absence for any of these situations. However, there will be no make-up exams for any of the three mid-course exams. This allows the class as a whole to maintain continuity of the course content, so that the course coordinator can immediately review the previous exam results with all students and clarify any poorly understood concepts without delay. Please be aware that if an excused absence is not obtained for any mandatory exam, it may result in an "N" grade for the course, as per the pre-clerkship excused absence policy.

Your best 2 of 3 scores from Exams 1, Exam 2 and Exam 3 plus your Final Exam score will determine your exam score points in the course (see below). After dropping your lowest score of the three mid-course exams, you can earn a potential of 100 points from the mid-course exams. The Final Exam will also be worth 100 points. In addition to your exam scores, you can potentially earn up to 20 points for Professionalism/Attendance. These points will be in a separate category and will count toward your passing score. The examination/assessment schedule is as follows:
<table>
<thead>
<tr>
<th>Assessments</th>
<th>Potential Earned Points</th>
<th>Material to be Covered</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mid-course Exams</td>
<td>100</td>
<td>• Exam #1: 50 points, Lectures from 10/4/2021 to 10/14/2021</td>
</tr>
<tr>
<td></td>
<td>(best two of three exam</td>
<td>• Exam #2: 50 Points, Lectures from 10/20/2021 to 10/27/2021</td>
</tr>
<tr>
<td></td>
<td>scores)</td>
<td>• Exam #3: 50 Points, Lectures from 11/2/2021 to 12/13/2021</td>
</tr>
<tr>
<td>Comprehensive Final Exam</td>
<td>100</td>
<td>Lectures 10/4/2021 to 12/12/2021</td>
</tr>
<tr>
<td>Professionalism/Attendance Points</td>
<td>Up to 20 points</td>
<td>See below for attendance events</td>
</tr>
<tr>
<td>TOTAL POTENTIAL POINTS</td>
<td>220*</td>
<td>*Must earn 75% or more (165 points or more) to pass</td>
</tr>
</tbody>
</table>

**Professionalism/Attendance Points**

Students can earn up to 20 points for attending designated Webinar events during the course. These points will be applied to a student’s final course score. Throughout your careers as physicians, there will be times where it will be important for you to **attend and be punctual** for certain events to convey respect for your patients and colleagues. Professionalism is a key attribute for a D.O. physician and is as important as book knowledge and clinical skills. Therefore, students in OST 579 will be rewarded with earned points for attendance at key guest lecture and laboratory events that can be applied to their total course score.

The designated events / dates are on the following table:

**Professionalism/Attendance Points Dates/Times**

<table>
<thead>

</tbody>
</table>

Students will be awarded their point(s) for attendance of the **entire** event. There will be no make-up events or partial points. Attendance will be documented using iClicker Reef Polling questions throughout the event. Each student is responsible for bringing a working device to these events.
• If the student does NOT document his/her attendance in the proper manner and on time the
student is considered absent for the event, regardless if the instructor or classmates can verify
your attendance.
• Falsification of an attendance record (e.g., signing in for someone other than oneself or signing
in and then leaving the session early) will be considered an instance of professional misconduct
equivalent to academic dishonesty (i.e. cheating). This is considered a serious situation and may
result in dismissal from the college. See MSUCOM policy regarding academic dishonesty and
professionalism.
• The student will be counted as absent if he/she arrives more than 5 minutes late to a session.
The student will be expected to participate in the activity if they are present and will be eligible
for points if they are fully engaged in the session.

Additional Attendance/Professionalism Bonus Points

Under special circumstances, Dr. Strobl may designate other events that may be eligible for additional
Attendance/Professionalism points. Since these are not on the original syllabus schedule, the students
will be notified by both an email and by a D2L post of such events. These are optional events and not
required. Students that participate (confirmed by REEF polling) in such events will be awarded one
“true bonus” point that will be applied to their final course score. These points will be in addition to the
other standard scoring that is outlined in the syllabus on pages 6 and 7.

Make-up Exams

Mid-Course Exams: There will be no make-ups for the first three exams. Your score will simply be
zero for a missed exam.

Final Exam: If an emergency prevents your attendance at the Final Examination, you MUST receive
an excused absence. Requests for an excused absence must be submitted via the student portal.

If a make-up Final Exam is needed, it will be given on date to be determined. The format of the
make-up exam will be at the discretion of the course coordinator.

If a student is eligible for a make-up Final Exam, please make every attempt to sit for the make-up
exam. If a true emergency arises, contact Mrs. Nancy Thoma at 517-719-8120 at least 30 minutes
prior to the scheduled start time of this exam. Mrs. Thoma will then contact the Course
Coordinator for preliminary determination if another excused absence is warranted. Please be
advised that Course Coordinator alone will make this determination and that another excused
absence is not guaranteed. You will not be eligible to take a remediation exam if you do not take
the final exam. Any unexcused absence will result in a Final Exam score of “0” and the student will
need to enroll in OST 579 when it is again offered in 2021.

Final Course Grades

Your final course grade will be reflected in D2L. You must take at least one of the first three exams and
the Final Exam to be eligible to either pass the course (165 points) or to be eligible to take remediation
If the student is ineligible for the remediation course, or fails remediation, the student will need to enroll in OST 579 when offered again in 2022.

- **P-Pass** – means that credit is granted and that the student achieved a level of performance judged to be satisfactory by the instructor. To obtain a “P” grade for this course, a student must obtain:
  - The composite of your best 2 scores on exams 1, 2 and 3 (potential of 100 points) plus the Final Exam (potential of 100 points) plus Professionalism/Attendance Points (potential of 20 pts) **At least 165 points are required for you to pass the course.**

- **N-No Grade** – means that no credit is granted and that the student did not achieve a level of performance judged to be satisfactory by the instructor. A student who accumulates less than 165 points will receive an “N” grade.
  - A student who receives an N grade on the basis of the examination cumulative score but was able to pass (75% or greater score) at least one of the examinations taken will be eligible to apply for remediation after an appropriate period of directed self-study.

  A student who receives an N grade on the basis of the cumulative score and was unable to pass any exam taken will not be eligible for remediation and will need to enroll in OST 579 when offered in 2022.

- **Remediation** – If you receive an “N” grade and meet the criteria below, you will be eligible to attempt remediation:
  - Earn a final percent score in the course of 65% or greater, and
  - Pass (75% or greater score) at least one of the examinations taken, and
  - Earn at least 15 of the possible 20 Attendance/Professionalism points

  The remediation opportunity for this course will be by examination. Passing is 75%.

  All remediation exams for semester FS21 are scheduled for January 4 or January 5, 2022. Refer to the remediation policy information provided in Section 2 of this syllabus for more information.

**Student Evaluation of the Course**

We want your feedback on how to improve this course.

- Informal Feedback: Please contact your Cardio Liaison throughout the course with any concerns or suggestions. You may also approach the Course Coordinator or any of the course faculty directly with your feedback.
- Mid-course Survey: After the second exam, a mid-course survey will be conducted to provide feedback to the Course Coordinator. This is your opportunity to help improve both the current and future courses.
- Formal Evaluation: In addition to the above, we ask every student in the class to complete formal on-line course evaluation upon conclusion of the course. Student course evaluations are highly recommended. Student feedback provides Course Coordinators with valuable information regarding their performance, the performance of their colleagues, and the quality of the course.
The information gained from these evaluations is used to continuously improve future offerings of this course. Students can access the evaluation system at: MSUCOM Pre-clerkship Evaluation System.

Evaluation will open on 12/11/21 and close on 1/10/2022

Section 2 – Policies

Please refer to the MSUCOM Student Handbook for these and other policies.

Academic Honesty and Professionalism

Every student is responsible for their behavior and is expected to adhere to all MSU and MSUCOM policies of academic honesty and professionalism, as outlined in the MSUCOM Student Handbook and the MSU Medical Student Rights and Responsibilities. These documents may be found on the MSUCOM website. Additional guidance on academic integrity may be found on the MSU Ombudsperson’s website at https://ombud.msu.edu/sites/default/files/content/Academic-Integrity-at-MSU-updated-August-2017.pdf

Incidents of academic dishonesty or professional misconduct will be addressed by the faculty, administration, or staff; such action may include, but is not limited to: giving a failing grade, referring a student for judicial review, directing the student to the Associate Dean of Medical Education, evaluation by the Committee on Student Evaluation, and other actions outlined in the Medical Student Rights and Responsibilities document.

Types of Class Sessions

MSUCOM designates lectures and other class sessions by their delivery method. While additional terms may be used in a specific course, the following will provide general guidance to the type of session:

- Live or livestream lecture: broadcast at a designated time; intended to be viewed synchronously
- Online Lecture: recorded content, may be viewed asynchronously
- Webinar: more interactive session where student participation is expected
- Lab: may refer to on-site clinical skills training or online lab session; see details

Changes to Course Schedule or Requirements

Due to external circumstances, the course requirements published in the course syllabus and/or course schedule may be subject to change. Timely notification Communication regarding changes will be provided to enrolled students via the course D2L site and/or email. Any changes made will consider the MSU Code of Teaching Responsibility and the MSU Medical Students Rights and Responsibilities.

Mandatory and Optional Class Sessions

All lectures and other class sessions are considered to be integral to the course, and students are expected to attend, view, or participate in each session. Some sessions are designated as “mandatory” in that attendance at the session on the scheduled date and time is required. Depending on the course, a student may earn points for attending or participating in a mandatory session or may lose points for failing to attend or participate. Availability of make-up points for missed sessions is at the discretion of
the course coordinator. Optional class sessions are offered by faculty to assist students in learning or reviewing course content.

Absences from Mandatory and Examinations/Assessments
It is the responsibility of the student to know which class sessions are deemed as mandatory and comply with the MSUCOM policy regarding absences from mandatory sessions and examinations. This policy may be found in the MSUCOM Student Handbook on the MSUCOM website. Requests for an excused absence must be submitted via the student portal.

Computer-Based Testing
It is the responsibility of each student to know and comply with the MSUCOM policy on computer-based testing. This policy may be found in the MSUCOM Student Handbook on the MSUCOM website.

Administration of quizzes, examinations, and other assessments may be self-proctored, virtual proctored, or classroom proctored. Regardless of the proctoring method, you are expected to take the exam in a quiet, private setting. Just like in a proctored exam, you are not to access notes, textbooks, references, your phone, or other materials, and you are not to interact with fellow students or others. Remember that integrity is defined as what you do when no one is looking.

You are also expected to not record, photograph, take screen shots, make notes of, or otherwise attempt to make a copy of any exam item for any purpose, including your personal use. A student who is discovered to have cheated or breached exam security will be subject to formal disciplinary action, up to and including dismissal from MSUCOM.

If you have concerns or evidence of an exam security breach on this or any exam, you may report that to an MSUCOM administrator or through the online concern form.

Medical Student Rights and Responsibilities
If problems arise between instructor and student, both should attempt to resolve them by informal, direct discussions. If the problems remain unsolved, the Associate Dean for Medical Education and/or the MSU Ombudsperson may be consulted. The MSU Medical Student Rights and Responsibilities (MSRR) document defines processes for additional steps, including submission of a formal grievance. The MSRR may be found in the MSUCOM Student Handbook and online at splife.studentlife.msu.edu.

iClicker Reef/(iClicker Student) Policy
It is your responsibility to know and comply with the iClicker Reef (iClicker Student) Policy. This policy may be found in the MSUCOM Student Handbook. If you forget your device or if it does not work, for whatever reason, no make-up experiences will be provided, and no points will be given.

If iClicker Reef/Iclicker Student is used to take attendance for an on-campus event, you will be expected to arrive to the physical location on time and to stay for the duration of the assigned activity. If iClicker Polling is used to take attendance for an online event, you will be expected to start the session at the scheduled time and participate for the duration of the assigned activity.

As a matter of professionalism, please note that under no circumstances should you provide access to your iClicker Reef/Student account to another student by sharing your device and/or account login, nor should you accept another student’s device or login credentials to access iClicker Polling on their
behalf. Answering questions or checking in for attendance on behalf of another student by using their device or account is considered to be academic dishonesty and may result in disciplinary action up to and including dismissal from the college.

Remediation
The MSUCOM Policy for Retention, Promotion and Graduation requires successful completion of each required course to progress in the curriculum. If you receive an “N” grade in a course, that grade will be recorded on your official transcript; you must meet the course requirement by successfully remediating or repeating the course.

Eligibility to attempt remediation of the course is determined by criteria described in the “Course Grades” section of the syllabus. If you are not eligible to attempt remediation, or if you fail the remediation, you must retake the course, provided you are eligible to continue in the program as determined by the Committee on Student Evaluation.

Student Safety and Well-being
The MSUCOM website and Student Handbook provide information on student safety, campus security, access to medical care and counseling services, and to policies on injuries and exposures. If you have an injury or acute illness on campus, an incident report should be completed. The form is available on the MSUCOM intranet or from Academic Programs.

Academic Support Resources at MSUCOM
As a way to acclimate you to the curriculum at MSUCOM, we have created a program called On Target: https://michiganstate.sharepoint.com/sites/OnTargetforAcademicSuccess

On this site you will find semester roadmaps which gives a general overview of each semester, tools needed to be successful in the curriculum and targeted resources for your unique learning situation. In each semester’s road map, you will also find course expectations, tips for success, potential trouble spots, longitudinal course integration, and specific course study guides.

Requests for Accommodations
Michigan State University is committed to providing equal opportunity for participation in all programs, services and activities. Requests for accommodations by persons with disabilities may be made by contacting the Resource Center for Persons with Disabilities (RCPD) at 517-884-7273 or online at rcpd.msu.edu. Once eligibility for an accommodation has been determined, you may be issued a Verified Individualized Services and Accommodation (VISA) form. Each VISA includes an expiration date; to request an accommodation, you must have an active VISA. You may work with RCPD to renew a VISA.

During the preclerkship curriculum, the college will help to coordinate accommodations for additional testing time. Provide your VISA to Nancy Thoma, thoman@msu.edu, A333 East Fee Hall at the start of the term and/or at least two weeks prior to the assessment event (test, project, labs, etc.). Requests for accommodations received with less notice will be honored whenever possible. You may choose
whether or not you wish to use accommodations for a particular event. For other accommodations, you may also review your VISA with the course coordinator and curriculum assistant assigned to that course.

**Title IX Notifications**

Michigan State University is committed to fostering a culture of caring and respect that is free of relationship violence and sexual misconduct, and to ensuring that all affected individuals have access to services. For information on reporting options, confidential advocacy and support resources, university policies and procedures, or how to make a difference on campus, visit the Title IX website at titleix.msu.edu.

Limits to confidentiality. Essays, journals, and other materials submitted for this class are generally considered confidential pursuant to the University's student record policies. However, you should be aware that University employees, including instructors, may not be able to maintain confidentiality when it conflicts with their responsibility to report certain issues to protect the health and safety of MSU community members and others. Instructors must report the following information to other University offices (including the Department of Police and Public Safety):

- Suspected child abuse/neglect, even if this maltreatment happened when you were a child;
- Allegations of sexual assault, relationship violence, stalking, or sexual harassment; and
- Credible threats of harm to oneself or to others.

These reports may trigger contact from a campus official who will want to talk with you about the incident that you have shared. In almost all cases, it will be your decision whether you wish to speak with that individual. If you would like to talk about these events in a more confidential setting, you are encouraged to make an appointment with the MSU Counseling and Psychiatric Services.

**Addendum: Course Schedule**

Course schedule for the current semester will be posted to D2L. Changes to the course schedule will be noted on the class academic calendar (“Google calendar”) and communicated to students via D2L and/or email. The schedule for the most recent offering of this course will be posted on the MSUCOM website under Current Students/Preclerkship Curriculum.
Addendum 2: Histology Lab

Specific Procedures for the Histology Lab

The OST579 Histology Lab Session for Fall 2021 will be delivered via webinar. Information regarding access to the Histology Lab Webinar will be provided at the course D2L site. You will need your Histology Lab Manual (contained within the course pack) and your required histology textbook (Pawlina).

- **Histology Laboratory Schedule**
  Your College will assign you to a specific 1 hour, 50 minute lab section. Your lab section assignment will be posted on the course D2L site. It is essential that you attend only the lab section to which you have been assigned. The Histology Lab website is available at any time via your personal computer. The Histology Lab website address is posted on the course D2L site.

- **Preparation for the Laboratory Session**
  To make your time during the Histology Lab Session productive, it is essential that you prepare beforehand. The Lab Manual, found in your coursepack, includes an Introduction to the Lab Session and a specific assignment for you to work through before the Lab Session (See "Preparation" section). You should also skim through the detailed directions for the Lab Session in order to obtain some idea of what will be covered during the Lab Session.

- **Resources to have available during the Laboratory Session**
  Your course pack contains a Histology Lab Manual, which is the essential guide to the structural features you will be looking for during the Lab Session, and to their significance. You may access the Histology Lab website at any time from your personal computer. The address for accessing the Histology Lab is posted on the course D2L site. Both the Lab Manual and the Histology Lab Website will frequently refer to pertinent material in the required histology textbook (Pawlina); so you should have that textbook available during the Lab Session.
