Notice to Students: Although course syllabi at MSUCOM have a consistent format, vitally important details differ by course. For this reason, you must read the syllabus thoroughly at the onset of each course to know what the course will provide and what is expected of you.

Section 1 – Course Information

Course Description

PSL539 is a 4-credit hour course.

Modern concepts of cell biology as a basis for understanding integration of structure (histology) and function (physiology) in health and disease (pathology). Introductions to adaptive growth response, cell injury, inflammation, hemodynamic disorders, and neoplasia.

Course Goals

Each of the following Goals is described more fully in the "Overview of the Course", which is found at the beginning of the PSL 539 Course Pack.

- To help you learn the most medically relevant vocabulary and concepts in cell biology, physiology and pathology.
- To help you begin to grasp the profound implications of the fact that function is always linked to structure, in every organ system and at every level of organization, from molecules to the whole body.
- To help you learn to "see" microscopic structure.
- To help you apply the clinically important concepts of cell biology, physiology and pathology to solve problems and make logical predictions.
- To help train you in the disciplines of self-study and lifelong learning.
- To foster collaborative learning.
- To personify the approach and character of basic biomedical science.
- To prepare you for Socratic clinical instruction.
- To help you understand that cell biology, physiology and pathology are tools for patient care.

Learning Objectives

Specific Learning Objectives are provided in the Course Pack (Study Guide) material for each lecture session and lab session.

College Program Objectives

In addition to the course-specific goals and learning objectives, this preclerkship course also facilitates student progress in attaining the College Program Level Educational Objectives, which are published in the MSUCOM Student Handbook.

Instructional Team

E-mail is the generally-preferred method of contact.

Key to Campus sites:

- EL = East Lansing
- DMC = Detroit Medical Center
- MUC = Macomb University Center

Course Coordinator

(Note - Preferred method of contact is shown in italics)

Name: Charles Lee Cox, Ph.D.

Phone: 517-884-5059

Email: coxlee@msu.edu

Address: 2201E Biomedical and Physical Sciences Building, EL

Histology Laboratory Director

Name: Frances Kennedy, D.V.M., M.S.

Phone: 517-432-0467

Email: kennedyf@msu.edu

Office: A514-C East Fee, EL

Histology Lab Leaders

Site	Name	Email	Phone

MUC	Beata Rodriguez	rodri583@msu.edu	586-263-6799

Lines of Communication

- For administrative aspects of the Course: contact the course coordinator Dr. Charles Lee Cox (coxcllee@msu.edu).
- For content questions relating to a specific lecture or topic: contact the faculty presenter for that specific portion of the course or your SE MI on-site instructor.
 - At East Lansing – Dr. Charles Cox (coxcllee@msu.edu)
 - At DMC -- Dr. Janice Schwartz (schwa317@msu.edu)
 - At MUC -- Dr. Carrie Nazaroff (tatarcar@msu.edu)
- For absences/missed exams (see excused absence information below)
- Please set your notifications in D2L to immediate to receive posted News announcements. You may choose to receive notifications by email or SMS.

Office Hours

Questions concerning the course may be discussed individually by making an appointment with the Course Coordinator, Dr. Charles Lee Cox, by phone at (517) 884- 5059 or via e-mail: coxcllee@msu.edu. with “PSL539” in the subject line.

Course Web Site

The URL for the Course website is: <https://d2l.msu.edu>.

LON-CAPA system – <https://loncapa.msu.edu>

LON-CAPA is the "Learning Online Network with Computer-Assisted Personalized Approach". In PSL 539, LON-CAPA will be used to administer:

- Basic Science Pretest -- This pretest is designed to familiarize you with the LON-CAPA interface and to stimulate your personal review of some basic concepts from chemistry, physics, math, and biology -- concepts that will be used but not taught in PSL 539 and your other Fall Semester courses. *Working through the Pretest is recommended, but not required. Your score on the Pretest does not contribute to your PSL 539 grade.*
- Pre-lab Problem Sets -- You are to complete a short, online problem set as part of your preparation for each of the 13 histology/pathology lab sessions in PSL 539. The first of these problem sets is for practice and will not contribute to your PSL 539 grade. The remaining 12 problem sets will be graded and will contribute to your Overall Course Score and grade in PSL 539 (see "Assessment" section of this Protocol). The Pre-lab Problem Set for each histology lab will become available at Noon on the Monday preceding the lab, and will be due at Noon on the day of the lab session.
- Homework Problem Sets -- These online problem sets are designed to help you integrate concepts from lecture, lab, and self-study, and to challenge you to apply those concepts to solve problems that have direct clinical relevance. The first of these homework problem sets is for practice and will not contribute to your PSL 539 grades. The remaining 8 homework problem sets will contribute to your Overall Course Score and grade in PSL 539 (see "Assessment" section of this Protocol). The opening date and due date for each Homework Problem Set are included in the Course Event Calendar and will be announced on the PSL 539 web site on D2L (in the weekly Announcements).
- Clinical Application Post-Session Problem Set -- This online LON-CAPA problem set is to test your understanding of the content which is discussed and covered in the Immuno-path Clinical Application session. The Clinical Application session is held on Oct. 30, 2020. The opening date and due date for this problem set will be announced on the PSL539 web site on D2L (in the weekly Announcements).

Network access

To access the web-based D2L and LON-CAPA systems, you will need a reliable broadband internet connection and an up-to-date browser. From off-campus locations, a cable modem, DSL connection, or equivalent will generally provide adequate speed and reliability. If you are having trouble using your own computer to access D2L or LON-CAPA, ask for help from the HIT-ET (Health Information Technology - Educational Technology) staff at your campus. Note, however, that arranging for timely, reliable access to D2L and LON-CAPA is ultimately your responsibility.

Graded Problem Sets on LON-CAPA – Expected conduct

(<https://loncapa.msu.edu>)

The Pre-lab Problem Sets and the Homework Problem Sets on LON-CAPA are open-book exercises. Moreover, you are permitted to work collaboratively with your PSL 539 classmates in preparing answers to these problem sets. However, for each graded problem set, you are expected to log onto your account on the LON-CAPA system independently, and to enter your own answers for grading. Failure to enter your own answers, yourself, or entering another student's answers for him/her will be considered to be cheating, and a breach of professional behavior.

Textbooks and Reference Materials

Required

- PSL 539 Course Pack (Study Guide) for Fall Semester, 2020
The Course Pack (which we will call the "Study Guide") will be produced and distributed in two parts. An electronic version of the Study Guide (in pdf format) is also available via a link on the PSL 539 D2L web site. The Study Guide is basically a workbook, developed by the course faculty to facilitate your achievement of the course objectives. Have the relevant sections of the Study Guide available during each lecture and lab session!
- Pawlina, Histology: A Text and Atlas, 8th ed., 2020. Lippincott, Williams & Wilkins [ISBN 978-1-4963-8342-6].
Note: It is essential that you have your own personal copy of this book. In particular, it is important that you have your own copy available during each histology/pathology lab session.
- Rhodes & Bell, Medical Physiology: Principles of Clinical Medicine, 5th ed., 2017. Lippincott, Williams & Wilkins [ISBN: 978-1-4963-1046-0]
- Robbins & Cotran, Pathologic Basis of Disease, 10th ed., 2021. Elsevier Saunders [ISBN: 978-0-323-53113-9]
- Ferrier, Lippincott's Illustrated Reviews: Biochemistry, 7th ed., 2017. Walters Kluwer/Lippincott, Williams & Wilkins [ISBN: 978-1-4963-4449-6]
- Sadler, Langman's Medical Embryology, 14th ed., 2019. Lippincott, Williams & Wilkins [ISBN: 978-1-4963-8390-7]

All of these textbooks will also be used in other courses in your curriculum, so you are advised to purchase and retain your own personal copies of these books.

Specific Procedures for the PSL 539 Histology Laboratory

Access - Histology Lab Sessions for Fall Semester 2020 will be delivered via webinar. Information regarding access to Histology Lab Webinars will be provided on D2L.

At all sites, the lab is computer-based; it uses virtual slides (digitized microscope slides), static images, as well as images from other designated web sites. For each lab session, you will need your lab manual (contained within the course Study Guide) and your required histology text (Pawlina).

Scheduled Labs: Your College will assign you to a specific 1 hour, 50 minute block for histology labs. This lab section assignment will also be posted on the PSL 539 D2L web site. It is essential that you attend only the lab section to which you have been assigned.

All laboratory materials, including the virtual microscope slides, are always available on the web via any computer that has broadband internet access. The web addresses for accessing histology/pathology lab material are posted on the PSL 539 D2L site.

Preparation for each laboratory session -- Pre-lab problem sets

To make your time in histology lab productive, it is essential that you prepare beforehand. For each lab session, the PSL 539 Study Guide includes an Introduction and a specific assignment for you to work through before each lab session ("Preparation for Lab"). You should also skim through the detailed directions for the lab session in order to get an idea of what you will be expected to accomplish during the lab session.

To reinforce the importance of preparing for lab, and to allow you to verify your readiness for lab, we will post a Pre-lab Problem Set online prior to each lab session. You will access the Pre-lab Problem Sets via the LON-CAPA system (<http://loncapa.msu.edu>). The problem sets will be available beginning Monday at Noon and will be "due" at Noon on the day of the lab session. Successful completion of the pre-lab problem sets on LON-CAPA will contribute to your Overall Course Score and Course Grade (see "Assessment" section of this Syllabus).

Resources to have available during each laboratory session

- Study guide – Your Study Guide provides an essential guide to the structural features you are looking for during lab and to their significance.
- Histology textbook – Both the Study Guide and online lab material will frequently refer to pertinent figures in the required histology textbook (Pawlina), so have your histology textbook available during each lab session.

Making the most of your time in histology lab

Being well prepared for each histology lab session (as directed above) and staying for the full lab time will allow you to take full advantage the laboratory session content.

Course-based Academic Support

The course faculty are here to facilitate your learning. Please feel free to contact the Course Coordinator with any personal issues you may have involving this course. Additional academic support resources can be accessed through MSUCOM Academic and Career Guidance and MSUCOM Personal Counseling.

Course Topics

Overview:

<u>Topic</u>	<u>Lecture Sessions</u>	<u>Lab Session</u>
Fundamentals:		
Introduction to Histology		1
Basic cytology	2	2
Elaboration on Signaling	3-5	
Early embryology	6	
Developmental mechanisms	7	
Connective tissue: Connective tissue proper	8-9	3
More connective tissue: Cartilage and bone	10-11	4
Elaboration on major themes: Transmembrane transport	12-14	
Epithelium	15-16	5
More connective tissue: Blood	17-21	6
Eicosanoids and quick review of signaling	22	
Lymphatic System	23-24	7
Cardiovascular overview	25-26	
Cell Injury and cellular accumulations	27-29	8
Inflammation and Tissue repair	30-32	9
Nervous tissue	33-35	10
Skeletal muscle	36-39	
Cardiac and smooth muscle	40-41	11
Autonomic nervous system	42-43	
Hemodynamic disorders	44-46	12
Neoplasia	47-51	13

Specific Course Schedule: A listing of Course Activities is posted on the PSL 539 D2L site. *However, the official Course Calendar is the [Academic Calendar for COM Class of 2024](#).*

Course begin and end dates

PSL539 begins on August 31, 2020 and ends on December 15, 2020. See addendum for detailed daily course schedule.

Exams/Assessments

The successful achievement of learning objectives will require knowledge and skills acquired in other portions of the overall MSUCOM educational program. Students will be expected to apply concepts and vocabulary learned in other courses to problem-solving for exams/assessments in this course.

To maintain security of assessments, you may NOT post questions on the discussion board regarding exam questions or quiz questions. Kindly email your questions to the course coordinator.

There will be a total of seven exams given in PSL539. The assessment schedule is as follows:

Assessments	Projected Points	Material to be Covered	Relevant lecture sessions	Relevant lab sessions
Unit Exam #1 Monday, 9/14/20	24	Cytology, Signaling, Early Embryology, Developmental Dynamics	1-7	1-2
Unit Exam #2 Monday, 9/25/20	27	Connective Tissue Proper, Cartilage & Bone and Transport	8-14	3-4
Unit Exam #3 Monday, 10/9/20	30	Epithelium and Blood, Eicosanoids signaling	15-22	5-6
Unit Exam #4 Monday, 10/23/20	27	Lymphatic System, Cardiovascular Overview and Cell Injury	23-29	7-8
Unit Exam #5 Monday, 11/6/20	24	Inflammation, Tissue Repair and Nerve	30-35	9-10
Unit Exam #6 Monday, 11/20/20	27	Muscle and Autonomic nervous system	36-43	11
Unit Exam #8 Tuesday, 12/14/20	30	Hemodynamic disorders, and Neoplasia	44-51	12-13
TOTAL	189			

Summary: Components of your Overall Course Score

Component	Description	Maximum Points
Labs (best ten):	20 Lab Points maximum	20 points maximum
Homework problem sets:	12 Homework Points maximum	12 points maximum
Clinical Application post-session problem set	2 points maximum	2 points maximum
Exam questions:	189 questions @ 1 point each	189 points maximum
Total = Overall Course Score		223 points maximum

Assessment

Your Overall Course Score in PSL 539 will be based on four components:

- Pre-lab Preparation— To reinforce the importance of preparing for lab, and to allow you to verify your readiness for lab, we will post a Pre-lab Problem Set online (using the LON-CAPA system) prior to each lab session. In general, the problem sets will be available beginning Monday at Noon and will be "due" at Noon on the day of the lab session. The problem set for Lab #1 is for practice and will not contribute to your Overall Course Score. The problem sets for Labs #2 - #13 will be graded and will contribute to your Overall Course Score.

A total of 2 Lab Points will be assigned to each of the twelve graded labs (Labs #2-#13). Specifically, each Pre-lab Problem Set on LON-CAPA is worth 2 points. Your best ten Pre-lab LON-CAPA Problem Sets (out of the twelve graded labs) will count toward your Overall Course Score. Achieving the maximum score of 2 on at least ten of the twelve graded labs (Labs #2-#13) would yield 20 Lab Points, which would contribute 20 points toward your Overall Course Score.

- Homework Problem Sets -- These online problem sets are designed to help you integrate concepts from lecture, lab and self-study, and to challenge you to apply those concepts to solve problems that have direct clinical relevance. Additional information about each problem set (including opening and closing dates for each problem set) will be announced on the course D2L web site. The first Homework Problem Set is for practice and will not contribute to your Overall Course Score. The remaining eight Homework Problem Sets will be graded and will contribute to your Overall Course Score. A total of 1.5 Homework Points will be assigned to each of the eight graded problem sets. Achieving the maximum of 1.5 Homework Points on each of the eight graded problem sets would yield a total of 12 Homework Points, which would contribute 12 points toward your Overall Course Score.
- Clinical Application Post Session Problem Set -- This online LON-CAPA problem set tests your understanding of the content that is covered in the Immuno-path Clinical Application Session, which will be held on October 30, 2020. A total of 2.0 points will be assigned to this problem set. Achieving the maximum of 2.0 points on this problem set would contribute 2.0 points toward your Overall Course Score.
- Exams—
There will be eight Unit Exams given during Semester 2. PSL 539 course material appears on seven of those exams. Specific questions in Unit Exams #1-6 & 8 will be assigned course credit

in PSL 539, as indicated in the chart below. Altogether, 189 exam questions will count toward your Overall Course Score in PSL 539. These exam questions will be based on Learning Objectives (listed in the materials for each lecture and lab session in the Course Pack). Many of the questions will integrate material from lectures, labs, and the assigned self-study activities.

Each of the 189 exam questions that count toward your Overall Course Score in PSL 539 will have the same weight. Each of these questions that you answer correctly will contribute 1 point toward your Overall Course Score (making a maximum of 189 points that can be earned on exam questions in PSL 539).

Course Grades

The course faculty determine the threshold for satisfactory performance in each preclerkship course. Your course grade will be determined by the following formula:

$$\begin{aligned} & (\text{exam 1} + \text{exam 2} + \text{exam 3} + \text{exam 4} + \text{exam 5} + \text{exam 6} + \text{exam 8} + \text{Labs} + \text{Homework problem sets} \\ & \quad + \text{Clinical application post session problems}) / (\text{total points possible}) \times 100\% \\ & = \text{Final percent score} \end{aligned}$$

- **P-Pass**—means that you have achieved a satisfactory level of performance and will receive credit for this course. To obtain a “P” grade for this course, you must earn a final percent score of 70.0%.
- **N-No Grade**—means that you have not achieved a satisfactory level of performance and no credit will be granted for this course. If you earn a final percent score below 70.0%, you will receive an “N” grade.
- **Remediation** – If you receive an “N” grade and meet the criteria below, you will be eligible to attempt remediation:
 - Earn a final percent score in the course of 60.0 % or greater

The remediation opportunity for this course will be by examination. Passing is 70.0%.

All remediation exams for semester 2 are scheduled for Tues., Jan. 5 and/or Weds., Jan. 6. Refer to the remediation policy information provided in Section 2 of this syllabus for more information.

* Notes:

- No "rounding up" will be done in calculating your Overall Course Score.
- Your Course Grade depends on the percentage of the maximum score that you earned.

The bottom line on professional behavior

Based on many years' experience, we expect that almost all students, through their own, honest efforts, will earn passing grades in PSL 539. However, failing PSL 539 (and then having to remediate) is not the worst thing that could happen to you in this course.

The worst thing would be to attempt to raise your own course score, or a classmate's score, by engaging in some form of cheating. Engaging in dishonest behavior erodes your self-respect, tarnishes the image of your class and your college, jeopardizes your medical career, and demeans the medical profession. Just don't do it!

If you have any questions or concerns about appropriate/inappropriate behavior in this course, please contact the Course Coordinator and/or your college's academic or student affairs administrators. Your communication may be anonymous, if you wish.

Achievement, not competition

The sole goal of the faculty is to facilitate your learning of cell biology and physiology. In all respects, the evaluation scheme for the course is set up to recognize and reward your best, honest efforts to achieve the learning objectives. No "curves" are used in grading, so there is no limit to the number of students who can earn high scores. As a result, a poor performance by another student will not benefit you in any way, whatsoever. Therefore, we expect you to cooperate with and encourage your classmates to the greatest extent possible (within the boundaries of professional integrity, of course).

We will be delighted if everyone does well in the course. However, we will not lower standards in order to "inflate" student performance. Easing standards is unfair to all concerned. It would give a false sense of accomplishment to marginal students, who would then be likely to have trouble in future courses and on Board exams. It would diminish the academic reputation of this medical school and erode the standards of the profession. It would also be an abrogation of our responsibility to the public at large, which expects expert medical care from thoroughly competent physicians. Although we will not lower standards to make things "easier", we will work with you in every other way possible to help you achieve success. Just tell us what you need.

Student Evaluation of the Course

We want your feedback on how to improve this course.

- Informal Feedback: Feel free to approach the Course Coordinator, Dr. Charles Lee Cox (coxlee@msu.edu), or any of the other course faculty with your reactions and suggestions.
- Formal Evaluation: In addition to the above, we ask every student in the class to complete a formal on-line course evaluation upon conclusion of the course. Student feedback provides Course Coordinators with valuable information regarding their performance, the performance of their colleagues, and the quality of the course. The information gained from these evaluations is used to continuously improve future offerings of this course. Students can access the evaluation system at: [MSUCOM Pre-clerkship Evaluation System](#).

Section 2 – Policies

Please refer to the [MSUCOM Student Handbook](#) for these and other policies.

Academic Honesty and Professionalism

Every student is responsible for their behavior and is expected to adhere to all MSU and MSUCOM policies of academic honesty and professionalism, as outlined in the MSUCOM Student Handbook and the MSU Medical Student Rights and Responsibilities. These documents may be found on the MSUCOM website. Additional guidance on academic integrity may be found on the MSU Ombudsperson’s website at <https://ombud.msu.edu/sites/default/files/content/Academic-Integrity-at-MSU-updated-August-2017.pdf>

Incidents of academic dishonesty or professional misconduct will be addressed by the faculty, administration or staff; such action may include, but is not limited to: giving a failing grade, referring a student for judicial review, directing the student to the Associate Dean of Medical Education, evaluation by the Committee on Student Evaluation, and other actions outlined in the Medical Student Rights and Responsibilities document.

Types of Class Sessions

MSUCOM designates lectures and other class sessions by their delivery method. While additional terms may be used in a specific course, the following will provide general guidance to the type of session:

- Live or Live or livestream lecture:
- Online Lecture:
- Lab Webinar:

Changes to Course Schedule or Requirements

Due to external circumstances, the course requirements published in the course syllabus and/or course schedule may be subject to change. Timely communication regarding changes will be provided to enrolled students via the course D2L site and/or email. Any changes made will consider the MSU Code of Teaching Responsibility and the MSU Medical Students Rights and Responsibilities.

Mandatory and Optional Class Sessions

All lectures and other class sessions are considered to be integral to the course, and students are expected to attend, view, or participate in each session. Some sessions are designated as “mandatory” in that attendance at the session on the scheduled date and time is required. Depending on the course, a student may earn points for attending or participating in a mandatory session or may lose points for failing to attend or participate. Availability of make-up points for missed sessions is at the discretion of the course coordinator. Optional class sessions are offered by faculty to assist students in learning or reviewing course content.

Absences from Mandatory Class Sessions and Examinations/Assessments

It is the responsibility of each student to know which class sessions are deemed as mandatory and comply with the MSUCOM policy regarding absences from mandatory sessions and examinations. This policy may be found in the MSUCOM Student Handbook on the MSUCOM website. Requests for an excused absence must be submitted via the [student portal](#).

Computer-Based Testing

It is the responsibility of each student to know and comply with the MSUCOM policy on computer-based testing. This policy may be found in the MSUCOM Student Handbook on the MSUCOM website.

Administration of quizzes, examinations, and other assessments may be self-proctored or virtual proctored. Regardless of the proctoring method, you are expected to take the exam in a quiet, private setting. Just like in a proctored exam, you are not to access notes, textbooks, references, your phone, or other materials, and you are not to interact with fellow students or others. Remember that integrity is defined as what you do when no one is looking.

You are also expected to not record, photograph, take screen shots, make notes of, or otherwise attempt to make a copy of any exam item for any purpose, including your personal use. A student who is discovered to have cheated or breached exam security will be subject to formal disciplinary action, up to and including dismissal from MSUCOM.

If you have concerns or evidence of an exam security breach on any exam, you may report that to an MSUCOM administrator or through the online concern form.

Medical Student Rights and Responsibilities

If problems arise between instructor and student, both should attempt to resolve them by informal, direct discussions. If the problems remain unsolved, the Associate Dean for Medical Education and/or the MSU Ombudsperson may be consulted. The MSU Medical Student Rights and Responsibilities (MSRR) document defines processes for additional steps, including submission of a formal grievance. The MSSR may be found in the MSUCOM Student Handbook and online at splife.studentlife.msu.edu.

Reef Polling (iClicker Cloud) Policy

It is your responsibility to know and comply with the Reef Polling (iClicker Cloud) Policy. This policy may be found in the MSUCOM Student Handbook. If you forget your device or if it does not work, for whatever reason, no make-up experiences will be provided, and no points will be given.

If Reef Polling is used to take attendance for an on-campus event, you will be expected to arrive to the physical location on time and to stay for the duration of the assigned activity. If Reef Polling is used to take attendance for an online event, you will be expected to start the session at the scheduled time and participate for the duration of the assigned activity.

As a matter of professionalism, please note that under no circumstances should you provide access to your iClicker Reef account to another student by sharing your device and/or account login, nor should

you accept another student's device or login credentials to access Reef Polling on their behalf. Answering questions or checking in for attendance on behalf of another student by using their device or account is considered to be academic dishonesty and may result in disciplinary action up to and including dismissal from the college.

Remediation

The MSUCOM Policy for Retention, Promotion and Graduation requires successful completion of each required course to progress in the curriculum. If you receive an "N" grade in a course, that grade will be recorded on your official transcript; you must meet the course requirement by successfully remediating or repeating the course.

Eligibility to attempt remediation of the course is determined by criteria described in the "Course Grades" section of the syllabus. If you are not eligible to attempt remediation, or if you fail the remediation, you must retake the course, provided you are eligible to continue in the program as determined by the Committee on Student Evaluation

Student safety and wellbeing

The MSUCOM website and Student Handbook provide information on student safety, campus security, access to medical care and counseling services, and to policies on injuries and exposures. If you have an injury or acute illness on campus, an incident report should be completed. The form is available on the MSUCOM intranet or from Academic Programs.

Requests for Special Accommodations

Michigan State University is committed to providing equal opportunity for participation in all programs, services and activities. Requests for accommodations by persons with disabilities may be made by contacting the Resource Center for Persons with Disabilities (RCPD) at 517-884-7273 or online at rcpd.msu.edu. Once eligibility for an accommodation has been determined, you may be issued a Verified Individualized Services and Accommodation (VISA) form. Each VISA includes an expiration date; to request an accommodation, you must have an active VISA. You may work with RCPD to renew a VISA.

During the preclerkship curriculum, the college will help to coordinate accommodations for additional testing time. Provide your VISA to Nancy Thoma, thoman@msu.edu, A333 East Fee Hall at the start of the term and/or at least two weeks prior to the assessment event (test, project, labs, etc.). Requests for accommodations received with less notice will be honored whenever possible. You may choose whether or not you wish to use accommodations for a particular event. For other accommodations, you may also review your VISA with the course coordinator and curriculum assistant assigned to that course.

Title IX Notifications

Michigan State University is committed to fostering a culture of caring and respect that is free of relationship violence and sexual misconduct, and to ensuring that all affected individuals have access to services. For information on reporting options, confidential advocacy and support resources, university

policies and procedures, or how to make a difference on campus, visit the Title IX website at <https://civilrights.msu.edu>

Limits to confidentiality - Essays, journals, and other materials submitted for this class are generally considered confidential pursuant to the University's student record policies. However, students should be aware that University employees, including instructors, may not be able to maintain confidentiality when it conflicts with their responsibility to report certain issues to protect the health and safety of MSU community members and others. Instructors must report the following information to other University offices (including the Department of Police and Public Safety):

- Suspected child abuse/neglect, even if this maltreatment happened when you were a child.
- Allegations of sexual assault, relationship violence, stalking, or sexual harassment.
- Credible threats of harm to oneself or to others.

These reports may trigger contact from a campus official who will want to talk with you about the incident that you have shared. In almost all cases, it will be your decision whether you wish to speak with that individual. If you would like to talk about these events in a more confidential setting, you are encouraged to make an appointment with the MSU Counseling and Psychiatric Services.

Addendum: Course Schedule

Course schedule for the current semester will be posted to D2L. Changes to the course schedule will be noted on the class academic calendar ("Google calendar") and communicated to students via D2L and/or email. The schedule for the most recent offering of this course will be posted on the MSUCOM website under Current Students/Preclerkship Curriculum.
